Company

The history of our family business began in 1994, when we started to cooperate with international gastronomic chains entering the Polish market. We have been paying a special attention to the quality of our products for over twenty years.

Own distribution fleet allows us to control transport conditions as well as to adjust distribution to individual customer needs. Our factory makes it possible to produce high quality salads and food products, without adding preservatives. Both of the above features combined with our own farm located in the industry-free region of the Świętokrzyskie Mountains enables us to control the quality of the products all the way from the fields to the table. We use our own agricultural produce and in the remaining components, whenever possible, we supply ourselves from local Polish farmers and producers. The quality of our products is confirmed by a BRC certificate in degree A since 2005 as well as a certified HACCP quality system. The main types of products offered by our company are packed lettuce, fresh and mayonnaise salads, vegetable mixes, sauces, sandwiches, soups, yogurt desserts, lunch sets, as well as vegetable burgers.

Burgers

Many bistros and restaurants have an extensive range of meat burgers, but the offer for vegans and vegetarians is quite limited.

Why then only 100-percent carnivores should have a pleasure of eating a juicy burger?

VegeTable vegan burgers are our response to the expectations of consumers looking for an alternative to meat burger classics. The extensive selection of flavors offered by our company will satisfy not only vegetarians and vegans, but even the declared fans of meat will appreciate the flavor of our burgers. An ideal addition will be vegan sauces, which perfectly complement the aroma of vegan specialties.

Vegan Burgers

Beetroot

– traditional vegetables from Polish fields in a modern style

Nutritional information	per 100 g serving
